- Notes:
- "hwl" movements are accessed by selecting the "Howell" button
"how" movements are accessed by selecting the "Custom Movement" button
 - Where there are both hwl and how movements for the same number of tables, boards and rounds, it is likely that the how movement uses arrow-switching to provide a more balanced movement
- * The 3-table howell movements do not work with BridgePad. If you want a 3-table movement using BridgePads, use the 3-table barometer movement instead.
